Education

Indian Institue of Information Technology,Pune

2020 – 2024

Bachelor of Technology, Computer Science and Engineering

Eklavya International Academy,Jaipur

2018 – 2019

Class-12th, Central Board of Secondary Education

90.80%

Eklavya International Academy,Jaipur

2016 – 2017

Class-10th, Central Board of Secondary Education

10 CGPA

Experience

Backend Developer

July 2023 – Present

Freelance

Remote

- Innovated Project Management Website for educational institutions, streamlining assignments and enabling collaboration.
- Built and tested **APIs**, harnessed **Django ORM** for efficient backend, and designed optimized **database tables**.
- Leveraged **Django** and **PostgreSQL** for adaptable, responsive design and seamless data organization.
- Strategically **refactored codebase** to enhance scalability and maintainability, while introducing **middlewares** within the backend to fortify application security against potential vulnerabilities.

Projects

Blog Website | *Flask, Jinja2, Ssqlalchemy,Authlib,WTForms,Sqlite*

Github — Demo

- Developed a fully functional Blog website using **Flask framework**, **Jinja templating** and **SQLite** database.
- Implemented authentication and authorization features using **Flask-Login** and **Flask-JWT** Extended libraries to ensure secure access to sensitive data.
- Designed and developed **CRUD** functionality for blog posts and user account information.

Task Manager | *ReactJs, Hooks, Material UI, State Management*

Github — Live

- Created responsive Task Manager app with **React**, utilizing **hooks** for optimal state management and local storage for secure task data.
- Enabled task creation, editing, deletion, priority settings, **status tracking**, and **due dates** within the app.
- Enhanced usability with advanced **filters**, empowering users to efficiently organize and view tasks by priority and status.

Flight Price Prediction App | *Pandas, numpy, matplotlib, Scikit-learn*

Github

- Developed an end-to-end flight price prediction system that involved **data preparation**, **feature extraction**, and **model development**.
- Employed advanced feature selection methods to achieve a remarkable accuracy of **82%** using **RandomForest**.
- Designed and developed a user-friendly **Flask app** that enables travelers to access accurate flight prices with ease.

Certifications

- Software Training
- Machine learning by Andrew Ng

Profile Links

- LeetCode
- Hackerrank
- GeeksforGeeks
- Medium

Coursework

- Data Structures
- Operating System
- Artificial Intelligence
- Information Retrieval
- Computer Networks
- Database Management
- Machine Learning
- Image Processing

Technical Skills

Languages: Python, C++, Javascript, C, HTML, CSS, Bootstrap, Advance SQL

Developer Tools: VS Code, Anaconda, Spyder, Jupyter Notebook, Google Colab, Power BI, Github

Others: Object Oriented Programming, Data Analytics, Machine Learning, Deep Learning

Achievements

- Ranked in the top **1.8** percentile candidates in JEE Main 2020
- Secured rank **864** out of 70,000 candidates appeared in COMEDK 2020
- **5*** in SQL and Python on Hackerrank
